

11 April 1957

MEMORANDUM FOR: AD/CR

SUBJECT : ICA Cablegrams, Airgrams and Documents

1. Attached is a statistical summary showing the cablegrams, airgrams and documents received from ICA (FOA, NSA, ECA) - July 1954-December 1956.

2. CIA receives an average of 1,800 incoming and outgoing ICA cablegrams and 5,200 incoming and outgoing airgrams per month. CIA also receives some 50-100 other documents per month, such as area data books, project bulletins, operations and post reports, etc.

3. Also attached are copies of the cablegrams and airgrams received in one package on 11 April 1957 which represents about $\frac{1}{2}$ of the day's receipts from ICA.

4. Our disseminators review the ICA material and screen out (throw away) over 50% as being of no interest for intelligence purposes. The balance is disseminated to the offices who have indicated an interest in certain types of cablegrams or airgrams or have reading requirements covering them. Cablegrams and airgrams are not intellexed or micro-filmed and source cards are not made.
